USER MANUAL

Admin Console

For Super Admin and Admin logins

This manual explains every screen in the Admin Console: what each page is for, every field you can fill in, and the step-by-step workflows for the tasks you do most often. The Admin Console has full access to the system, including the Logins page where you create accounts and reset passwords.

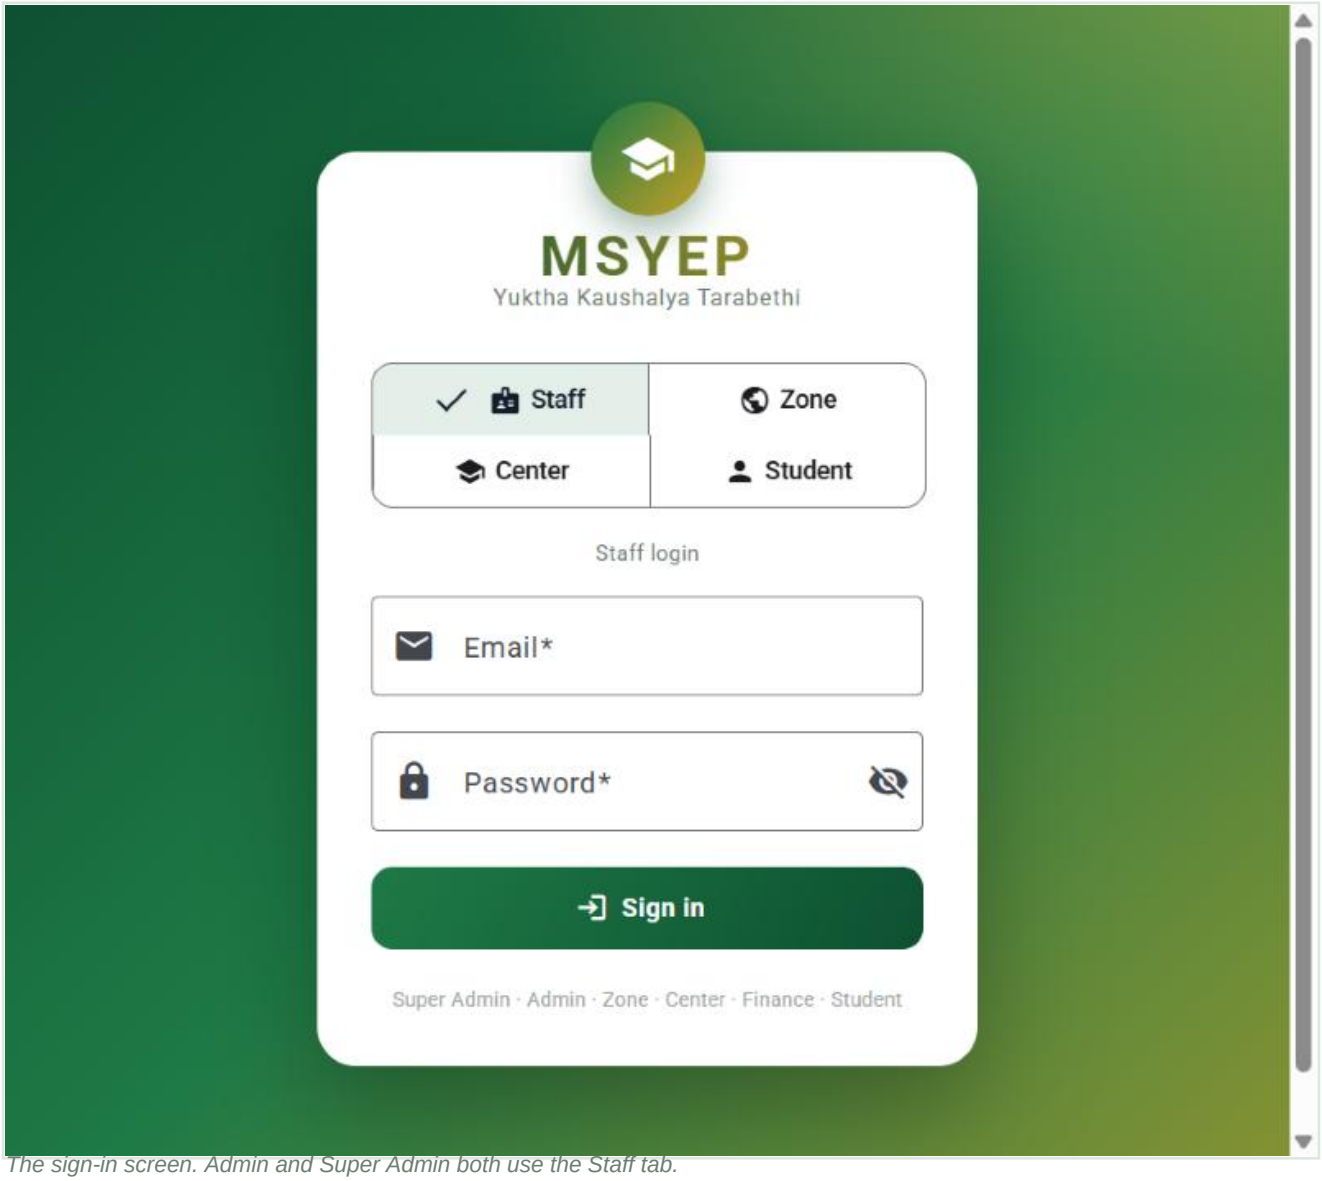

In this manual

1. Signing in
2. Finding your way around
3. Zones (Franchise)
4. Zone Mail - sending Certificate & MOU
5. Centers (Colleges)
6. Students
7. Staff, SOW and Resource Persons
8. Location Management
9. Finance Wing
10. Logins - creating and managing accounts
11. Admin Signature
12. If something goes wrong

Version 1.1 · 23 October 2026

Signing in

Open the portal in any browser. On the live site use https://msyep.in; on a test machine use http://localhost:4200.

The sign-in screen. Admin and Super Admin both use the Staff tab.

How to sign in

1. Leave the role selector on Staff. (The four buttons only change the hint text - your account's role decides which portal opens.)
2. Type your Email - for the Super Admin this is superadmin@msyep.in.
3. Type your Password. Click the eye icon on the right to check what you typed.
4. Click Sign in. You land on the Dashboard.

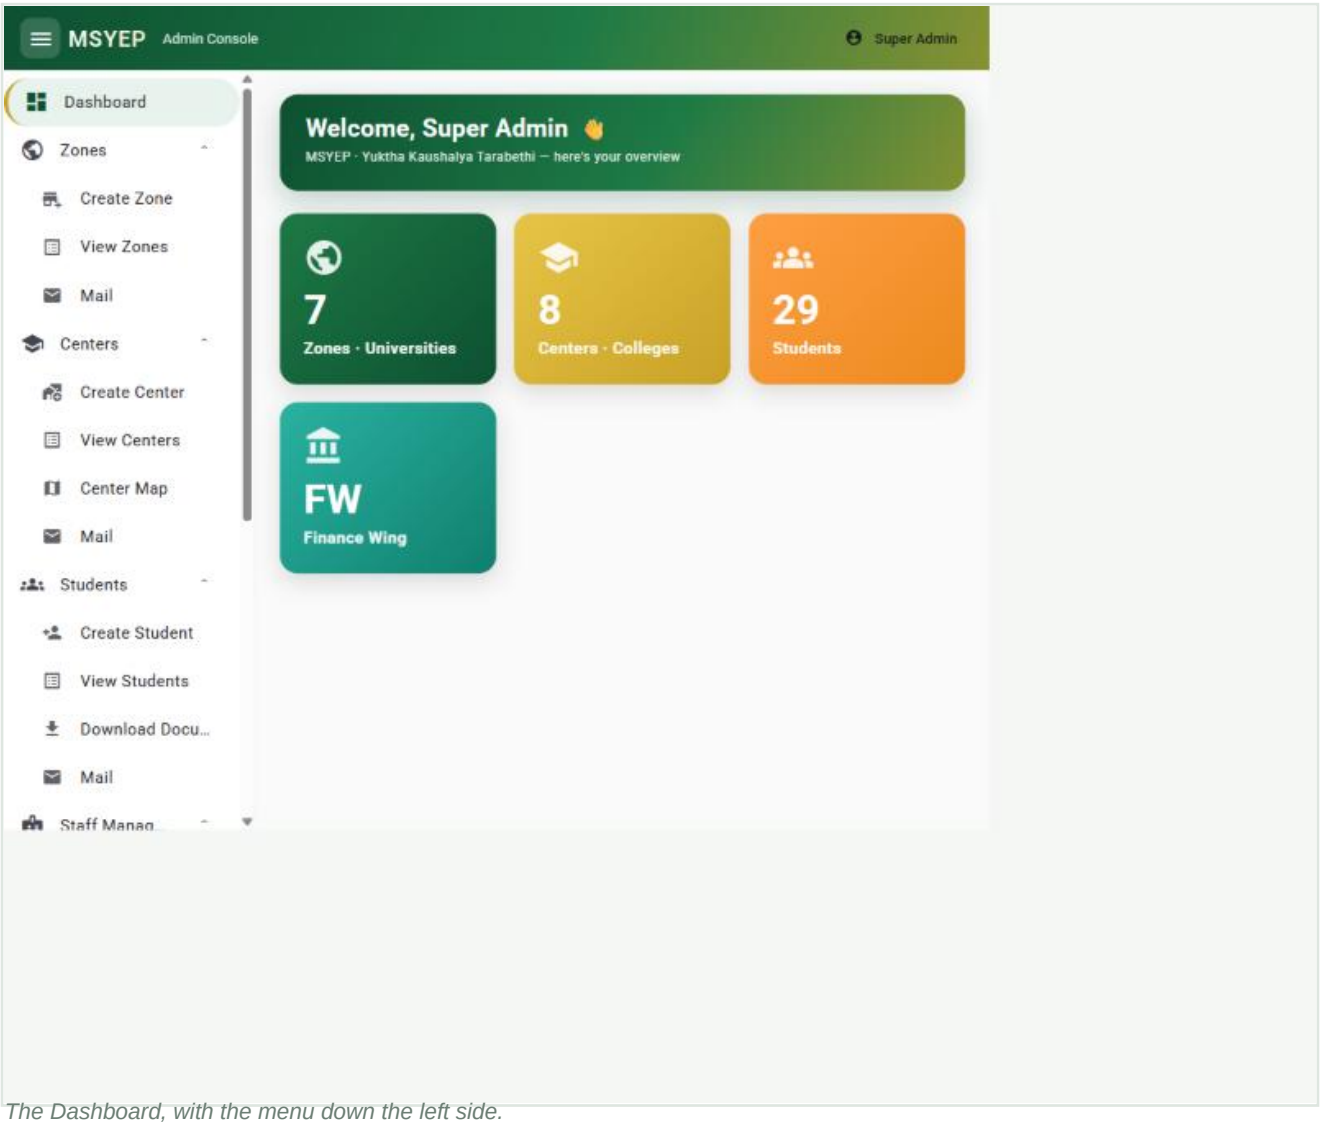

> If the page sits on "Waking up the server...", that is normal. The hosted server sleeps when nobody has used it for a while and takes up to a minute to start. Wait rather than clicking Sign in again.

If you cannot get in

- Wrong username or password - check capitals; passwords are case-sensitive.

- Account is disabled - another admin has deactivated your login. Ask them to reactivate it on the Logins page.
- Forgot your password - only another Admin or Super Admin can reset it, from the Logins page.

Finding your way around

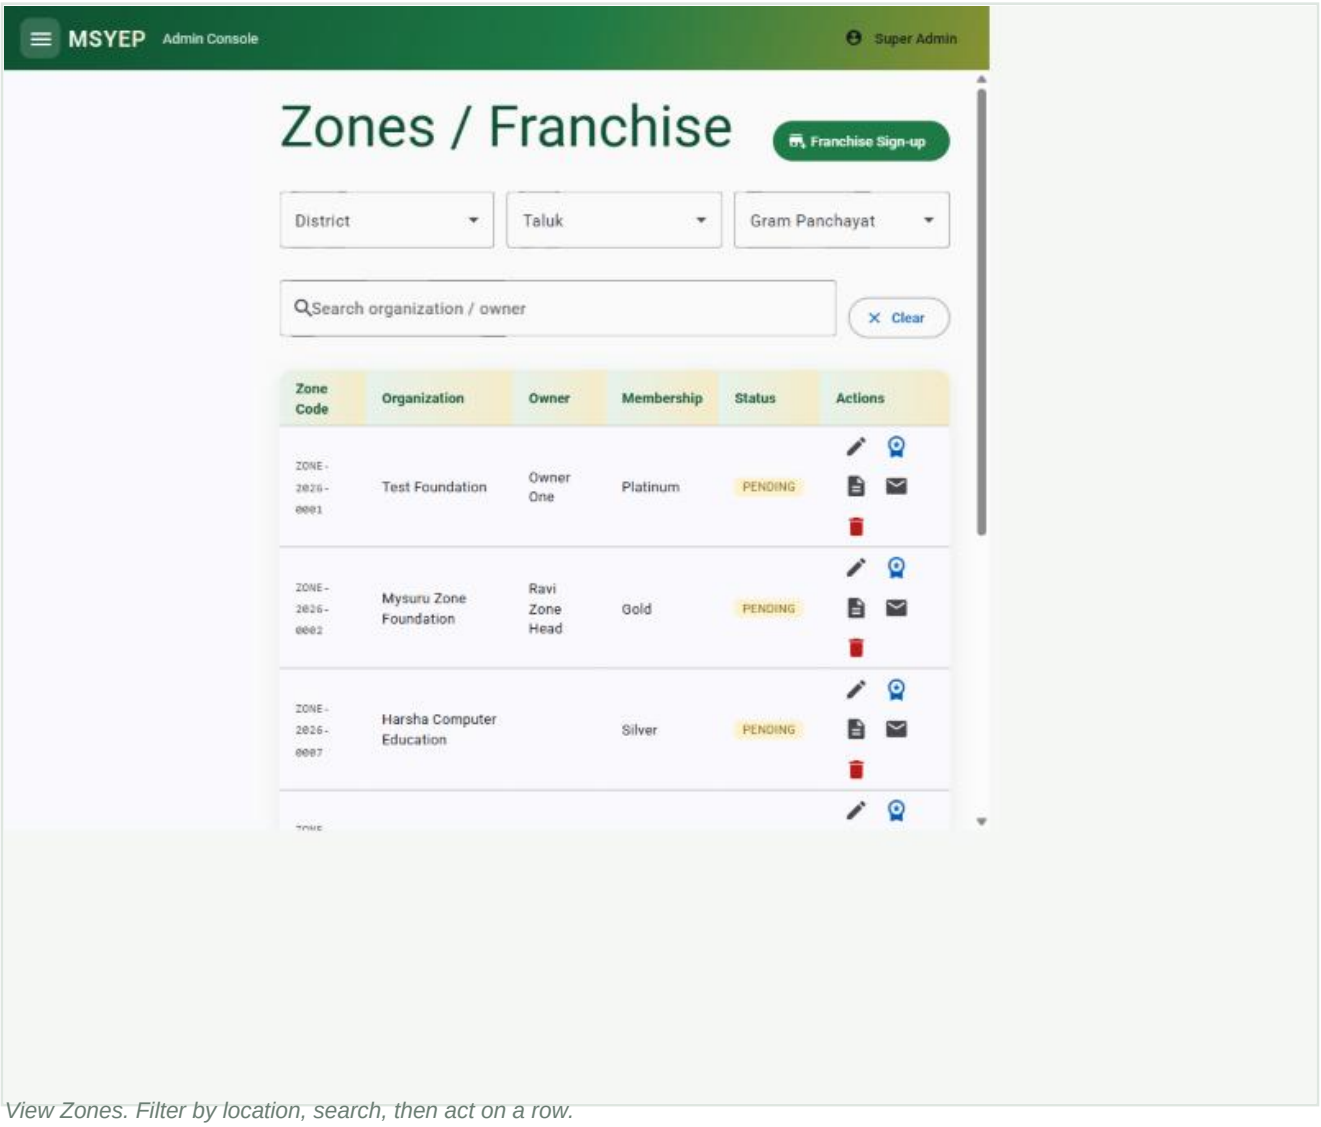

The Dashboard, with the menu down the left side.

- The coloured tiles are live counts - zones, centers and students currently in the system.
- The menu on the left is grouped (Zones, Centers, Students, Staff). Click a group to expand or collapse it.
- The [Menu] button at the top-left hides or shows the menu. On a phone the menu slides over the page; tap a link or the dark area to close it.
- Your name is at the top-right. Click it to Log out.

> The portal works on a phone. The menu collapses behind the [Menu] button and wide tables scroll sideways instead of squashing, so you can use it from the field.

Zones (Franchise)

A Zone is a franchise partner - usually a university or a trust that runs centers under it. Everything about a zone lives here: its sign-up form, its documents, its certificate and its MOU.

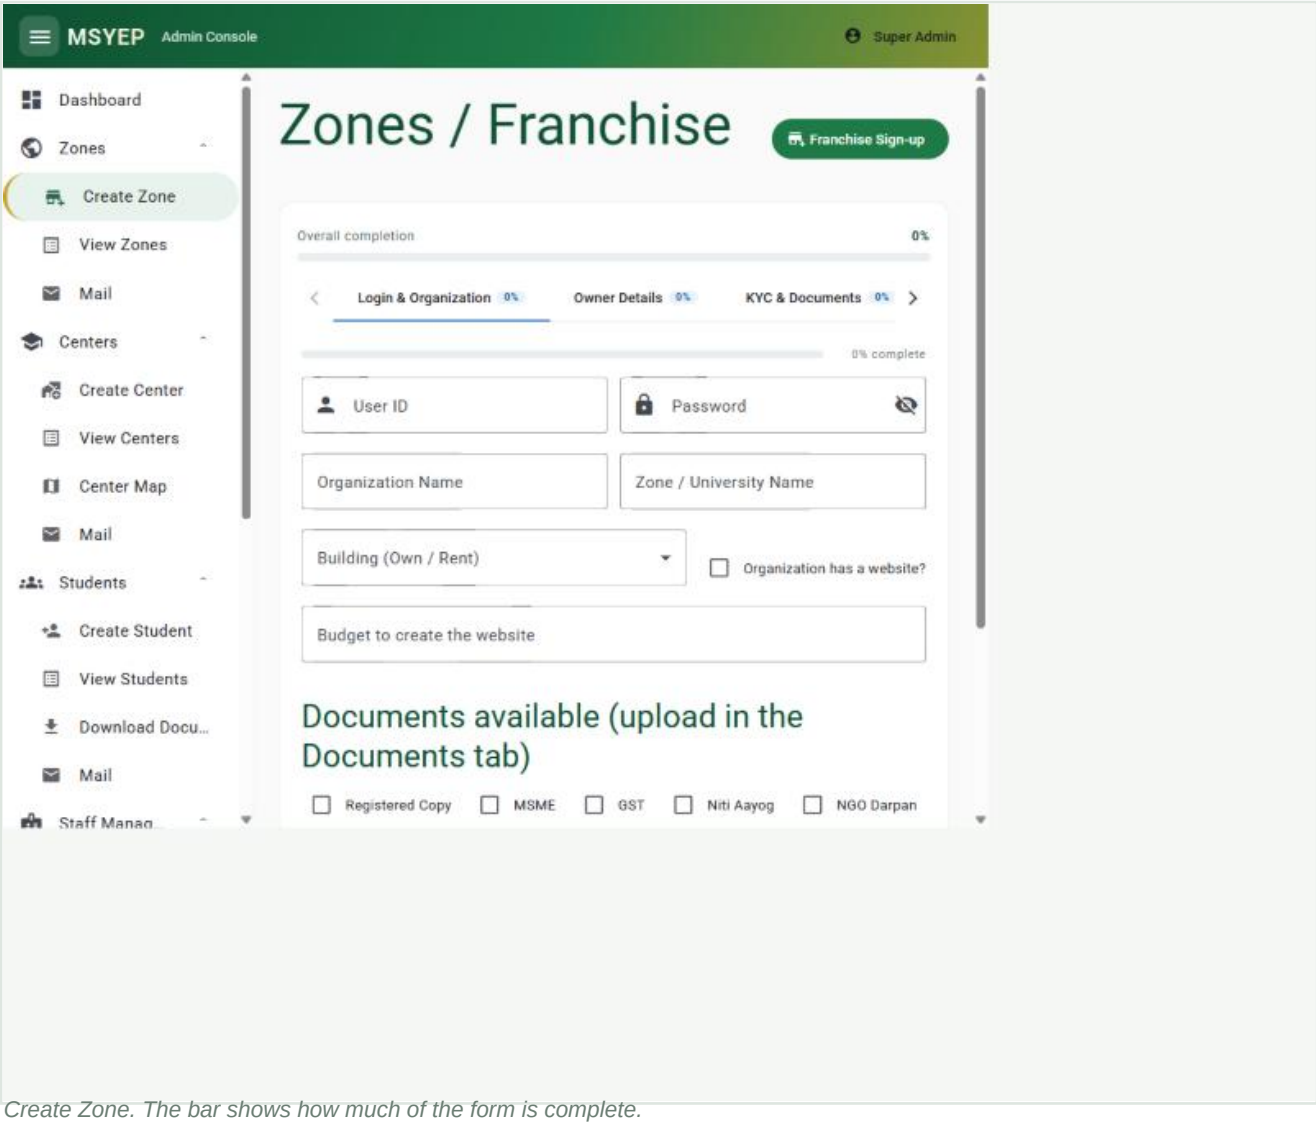

View Zones. Filter by location, search, then act on a row.

What the row buttons do

Field	What to enter
[Edit] Edit	Reopen the zone and change any detail.
[Certificate] Certificate	Download the Franchise Certificate PDF for that zone.
[MOU] MOU	Download the full MOU (42 pages) with logos and signatures applied.
[Mail] Mail	Email the Certificate and MOU to that zone.
[Delete] Delete	Remove the zone permanently.

> The first MOU download for a zone takes a few seconds while it is generated. After that it is cached, so the same MOU downloads instantly until you change something about the zone.

Creating a zone - the six tabs

Create Zone. The bar shows how much of the form is complete.

Click Franchise Sign-up, then work through the tabs. The percentage next to each tab tells you how much of that tab is filled. You can save and come back - nothing is lost between tabs.

Tab 1 - Login & Organization

Field	What to enter
User ID	The login the zone will use. Defaults to the organization name if left blank.
Password	The zone's password. Use the eye icon to check it.
Organization Name	Registered name of the trust / institution.
Zone / University Name	The university or zone this franchise covers.
Building (Own / Rent)	Whether they own or rent their premises.
Organization has a website?	Tick if yes.
Budget to create the website	Only if they do not have one.
Documents available	Tick each they hold: Registered Copy, MSME, GST, Niti Aayog, NGO Darpan, 12A / 80G.
Willing to comply?	Tick if they will obtain the missing documents.

Tab 2 - Owner Details

Field	What to enter
Owner Full Name	Name of the franchise owner.
Date of Birth	Owner's date of birth.
Gender	Select from the list.
Contact Number	Primary mobile number.
Alternate Number	A second contact number.
Email Address	Used for all mail sent to this zone.
Full Address / City / State / Pincode	Owner's postal address.
Occupation / Business Background	What the owner does.
Educational Qualification	Owner's highest qualification.
District / Taluk / Village or GP	Pick from the lists. If a place is missing, add it on the Location page first.

Tab 3 - KYC & Documents

Field	What to enter
Aadhaar Card Number	Owner's Aadhaar number.
PAN Number	Owner's PAN.
Bank Account Details	Account number, IFSC, bank and branch.
Document uploads (12 slots)	Upload the registration copy, MSME, GST, Niti Aayog, NGO Darpan, 12A / 80G and the owner's ID proofs.

> This tab holds Aadhaar, PAN and bank details. Only Admin, Staff, Zone, Center and Finance logins can open zone records - students can never see them.

Tab 4 - Business Fit

Field	What to enter
Investment Capacity (Rs.)	How much the partner can invest.
Preferred Location for Franchise	Where they want to operate.
Own or Rent the proposed space?	Ownership of the proposed premises.
Space Available (sq.ft)	Size of the premises.
How soon do you plan to start?	Expected start time.

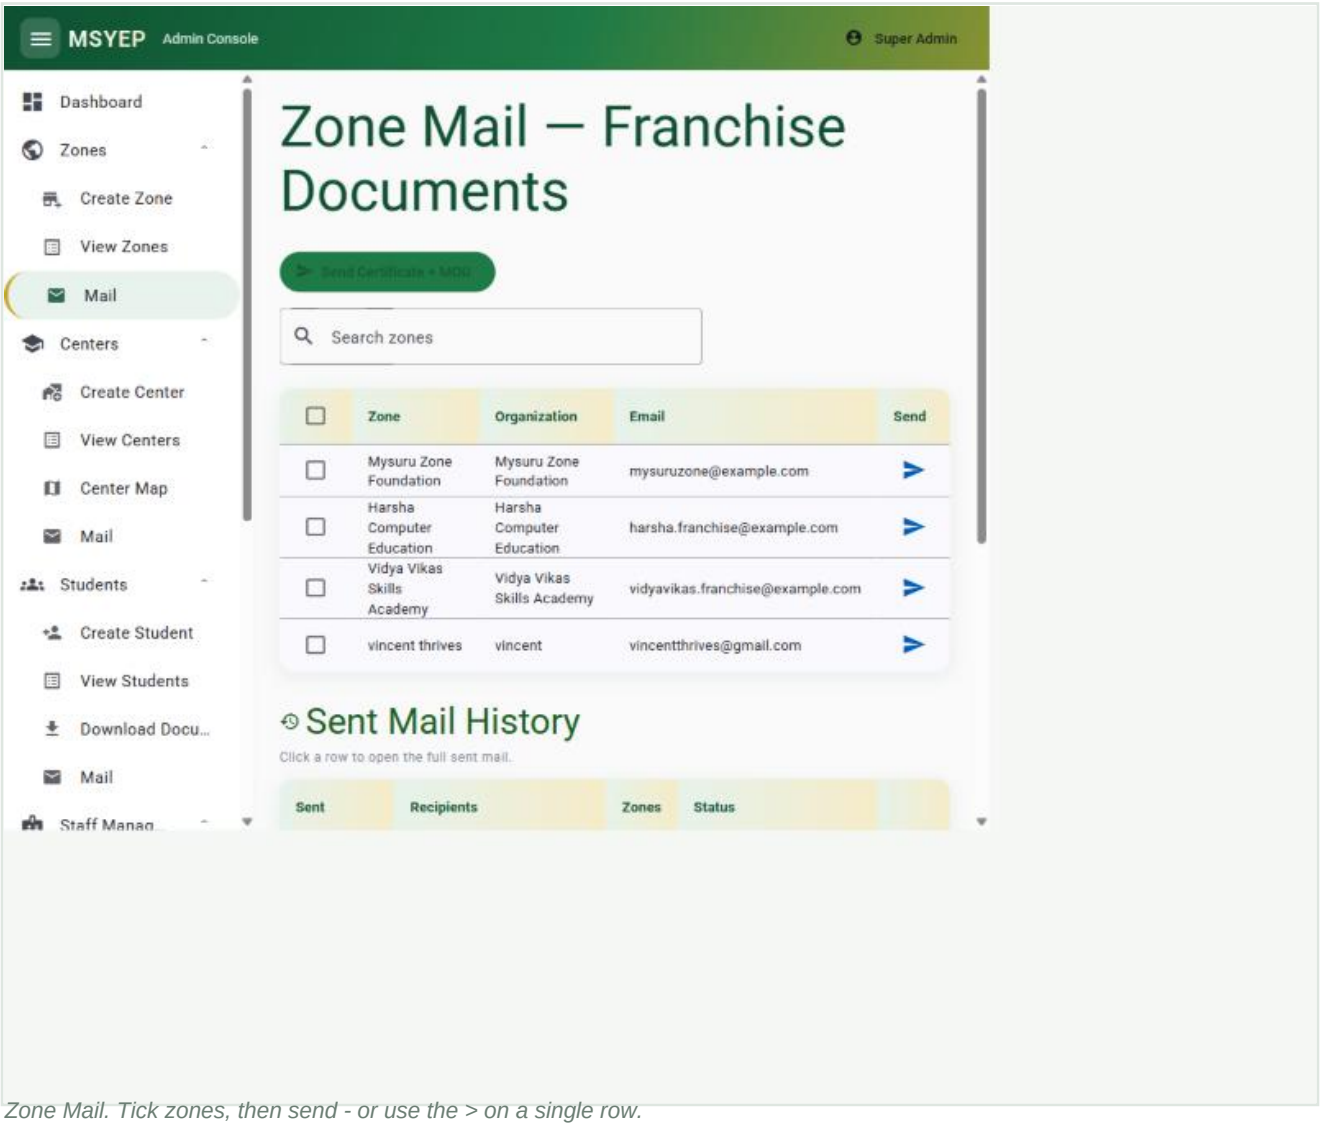

Tab 5 - Franchise Certificate

Field	What to enter
Franchisee / Trade Name	The name printed on the certificate.
Registration No.	Certificate registration number.
Issue Date	Date the certificate is issued.
Valid Till	Filled in automatically - two years after the issue date.
Territory	Taken from the membership tier.

Tab 6 - Membership & Submit

Field	What to enter
Membership tier	Silver, Gold or Platinum. This sets the territory on the certificate.
Terms & Conditions	Must be ticked before the form can be submitted.

Zone Mail - sending Certificate & MOU

Zone Mail. Tick zones, then send - or use the > on a single row.

1. Open Zones -> Mail.
2. Find the zone with the search box (it matches name, organization or email).
3. Tick one or more zones, or click the blue > on a single row to send to just that zone.
4. Click Send Certificate + MOU. Check the subject and message in the box that appears, then click Send mail.
5. The screen comes back straight away. Scroll down to Sent Mail History to see the result.

> Sending takes up to a minute because each mail carries the Certificate and the 42-page MOU (about 10 MB). The page does not wait for it - refresh Sent Mail History after a minute to see "1/1 sent".

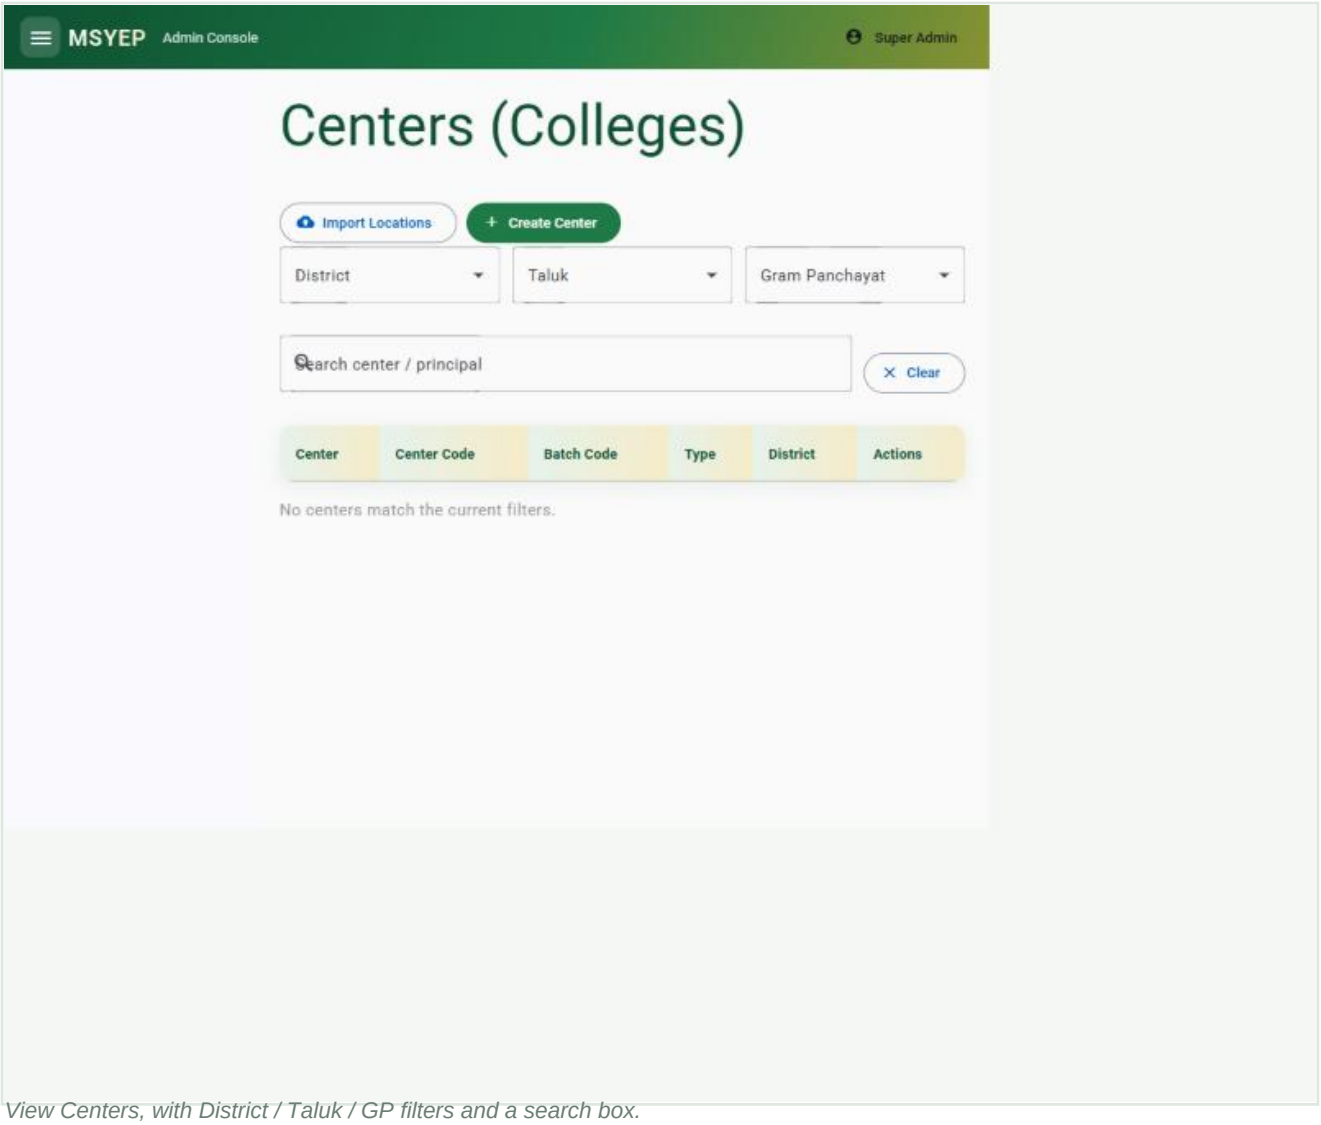

Reading the Sent Mail History

Field	What to enter
1/1 sent	Delivered successfully.
0/1 sent	Failed - usually the mail server could not be reached. Try again.
stub - SMTP not configured	The server has no mail credentials, so nothing was actually sent.
(empty recipients)	That zone has no email address saved. Add one on the zone record.

Click any history row to reopen the full mail, including its attachments.

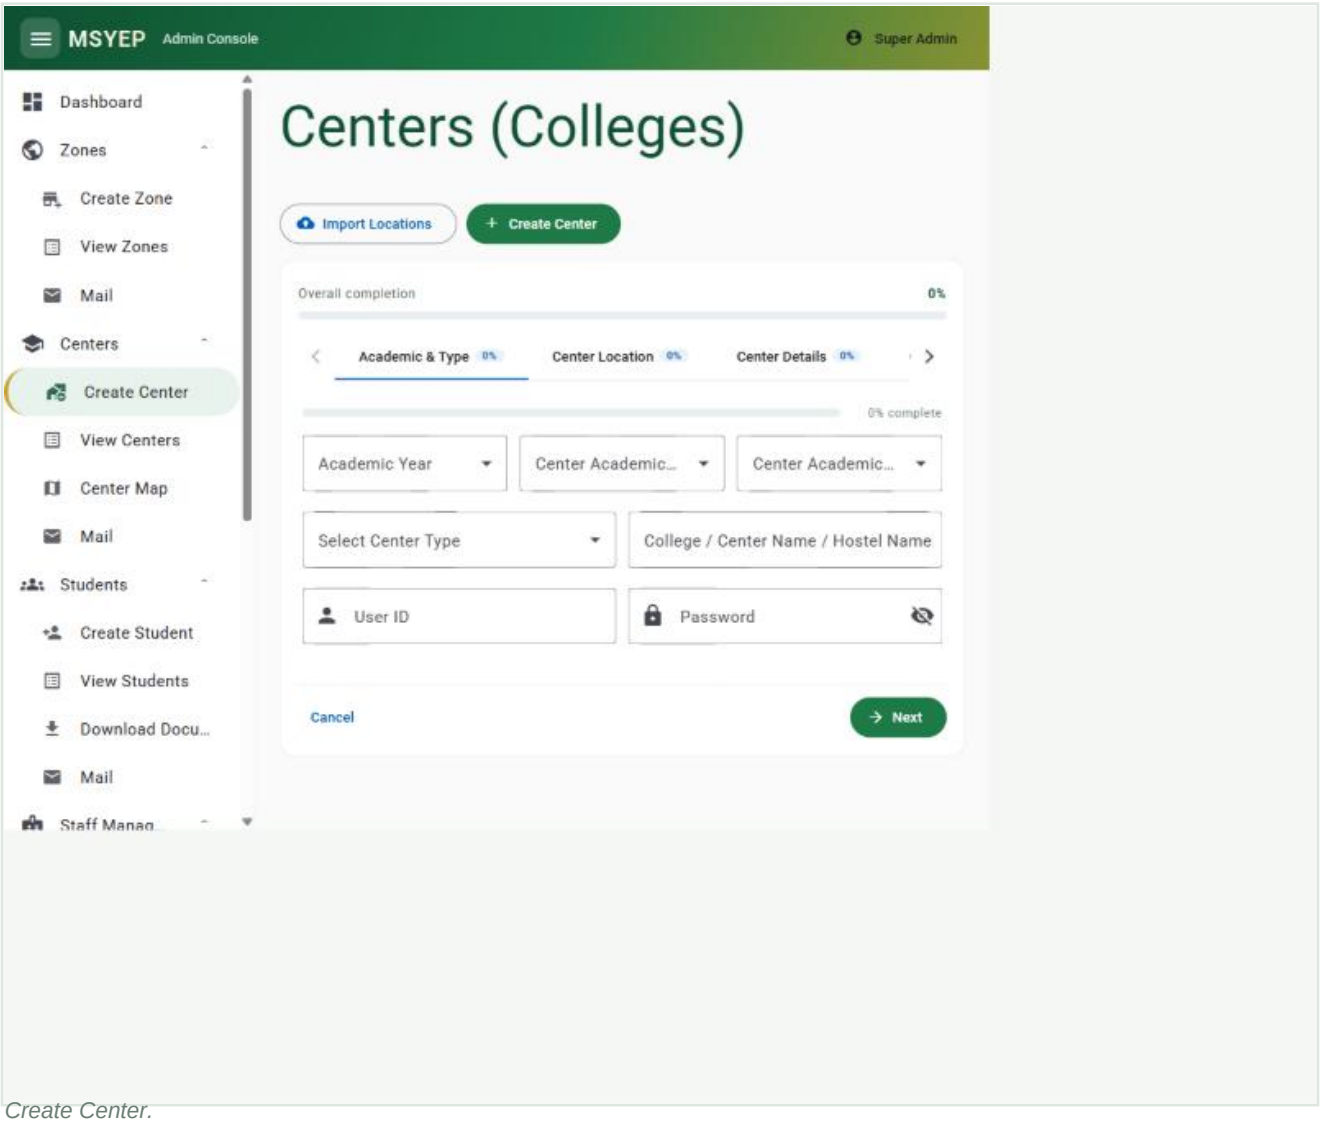

Centers (Colleges)

A Center is a college or hostel delivering the programme under a zone.

View Centers, with District / Taluk / GP filters and a search box.

Creating a center - the six tabs

Create Center.

Tab 1 - Academic & Type

Field	What to enter
Academic Year	The year this center is being set up for.
Center Academic Start / End Month	The academic calendar.
Select Center Type	College, hostel, or other type.
College / Center Name	Pick an existing college or type a new one.
User ID	The login for this center (normally its email).
Password	The center's password.

Tab 2 - Center Location

Field	What to enter
Center District / Taluk / Village or GP	Where the center is.
MSYEP Center Address	Street address.
MSYEP Center Locality	Locality or area.
Pincode	Postal code.

Zone (University)	Which zone this center belongs to.

Tab 3 - Center Details

Field	What to enter
Batch Year	The batch this center runs.
Center Mail-ID	Where all center mail is sent.
Center Office Number	Office phone.
Principal Name / Number	Head of the institution.
UUCMS / Computer Operator Coordinator	Name and number.
SC-ST Cell Coordinator	Name and number.
Placement (Kaushalya Patha) Coordinator	Name and phone.
Center has a website?	Tick if yes.

Tab 4 - Course Details

Field	What to enter
Enter your Center Courses	Type a course and press Enter. Repeat for each course.
Center Total Strength	Total students at the center.
3rd/4th Sem or 1yr - Total / SC / ST / General	Student numbers split by category.

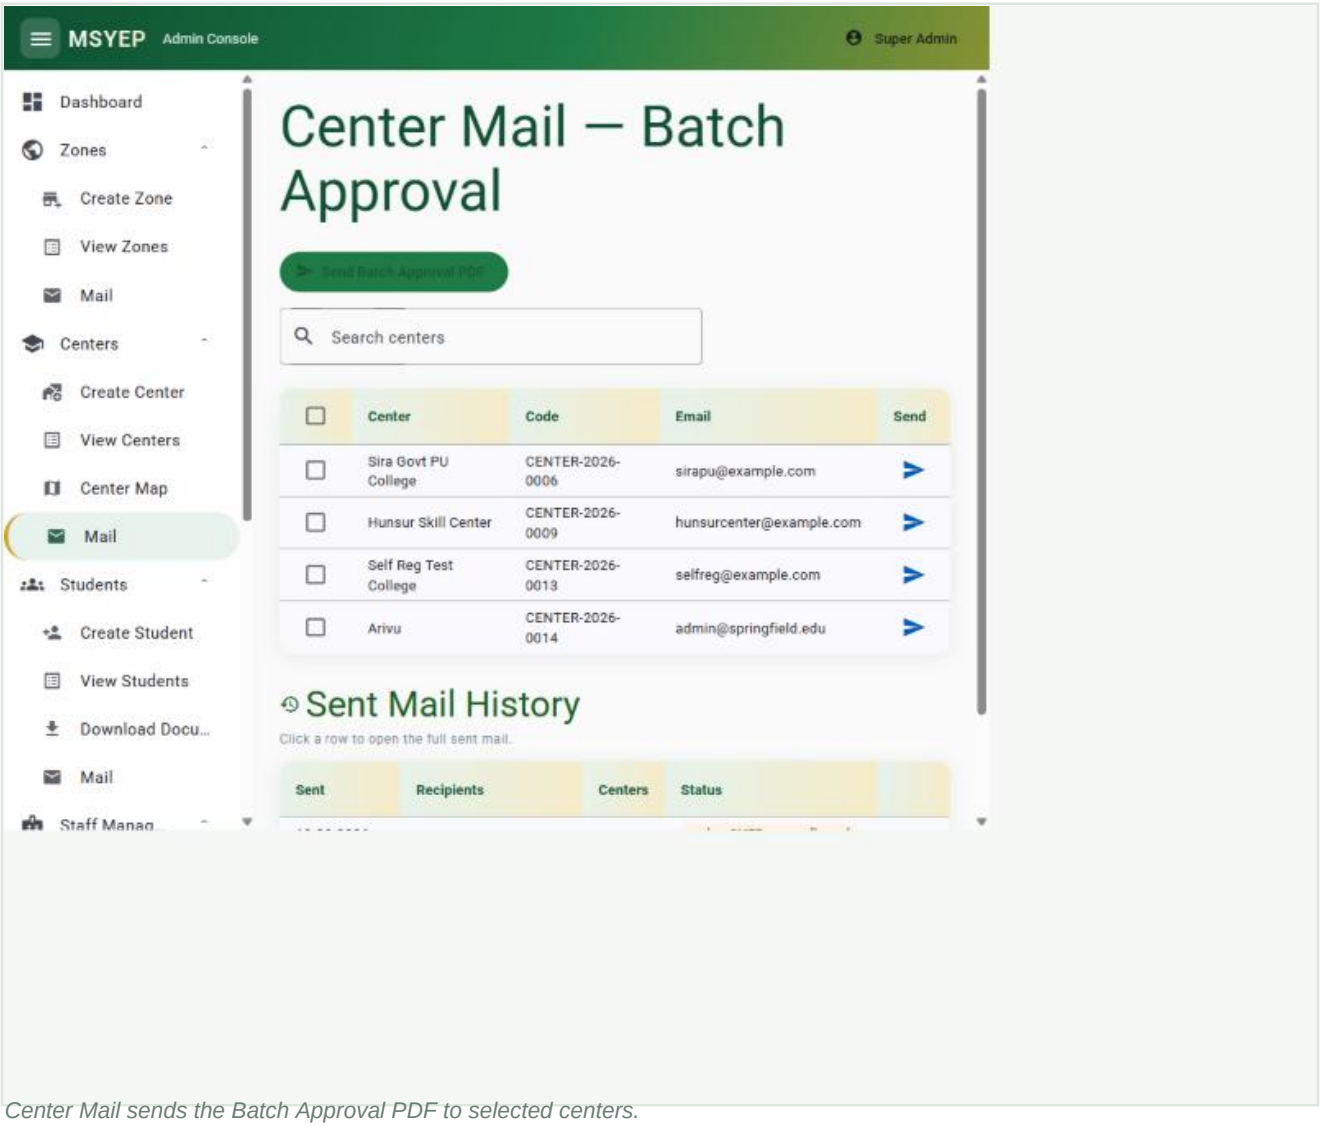

Tab 5 - MOU Details

Field	What to enter
MOU Date (from) / (to)	The period the MOU covers.
Year of Contract	Contract year.

Tab 6 - Documents

Field	What to enter
Document uploads (10 slots)	Upload the center's supporting documents.

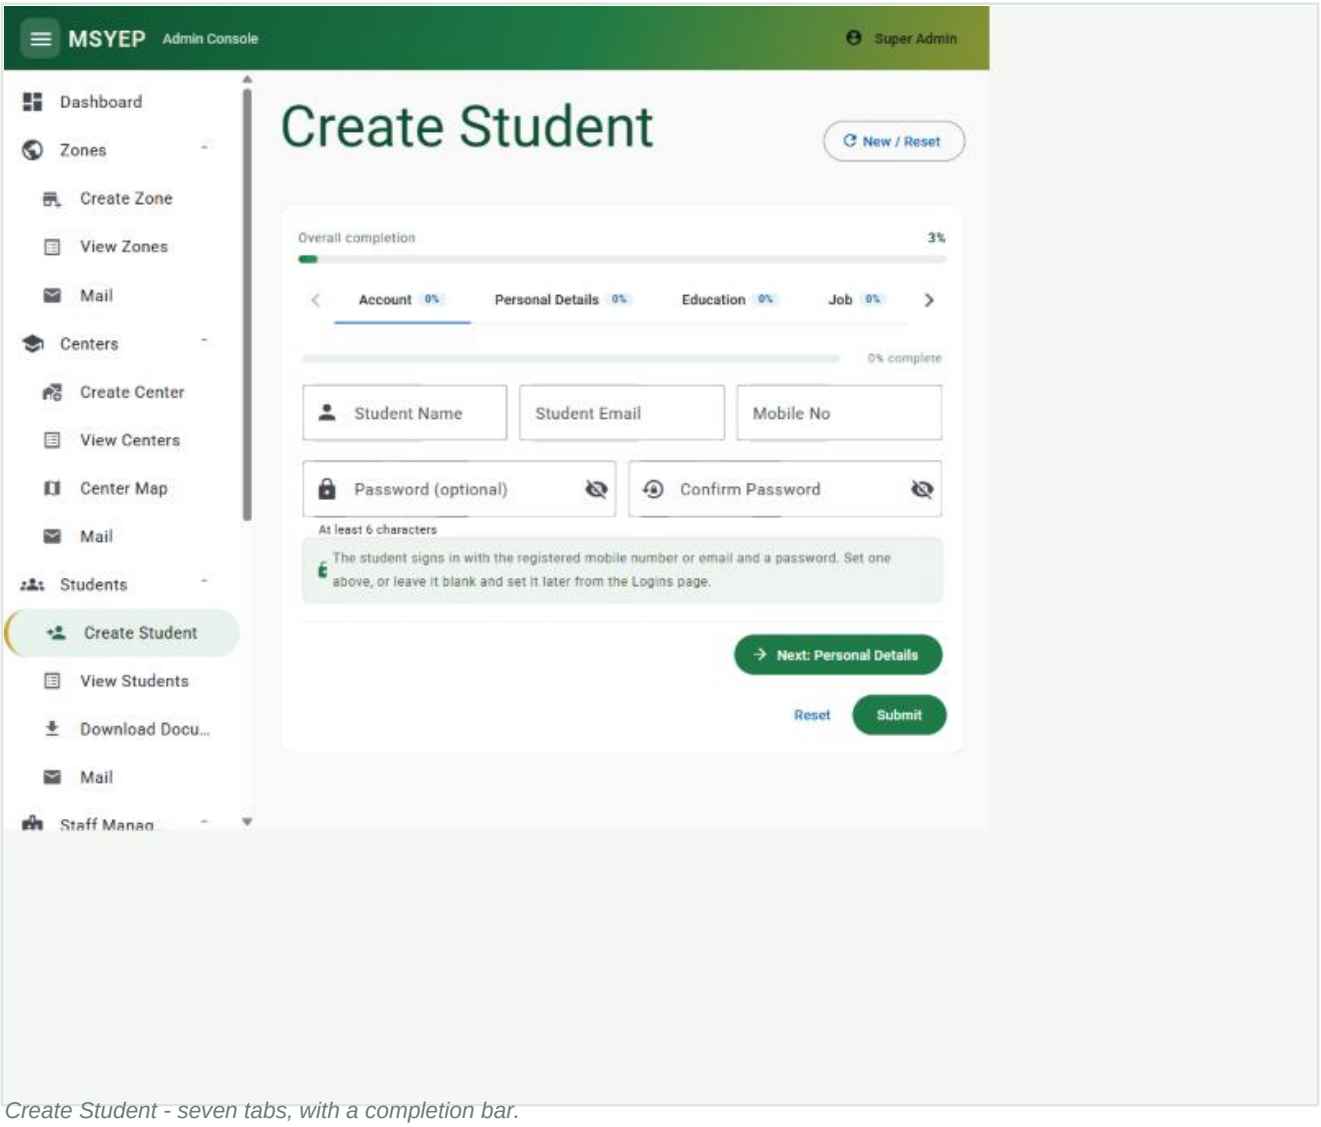

Center Mail - Batch Approval

Center Mail sends the Batch Approval PDF to selected centers.

1. Open Centers -> Mail.
2. Search for the center, then tick it (or click the > on its row).
3. Click Send Batch Approval PDF and confirm the message.
4. Check Sent Mail History below for the result.

Students

Create Student - seven tabs, with a completion bar.

Students normally register themselves from the login page. Use Create Student when you need to add someone centrally.

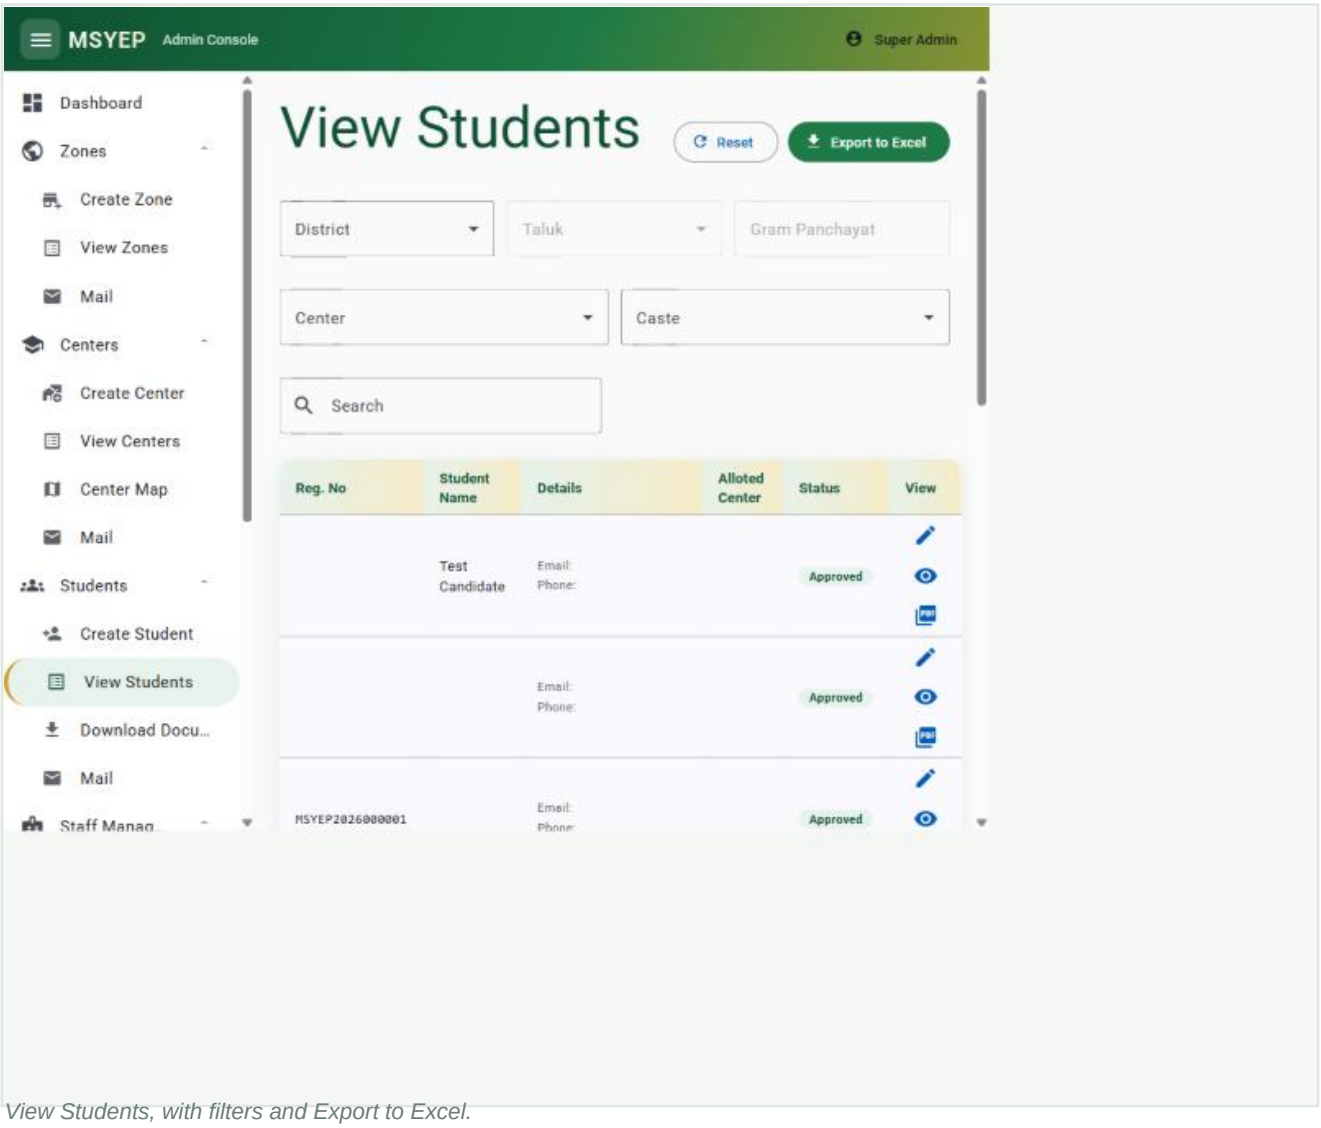

Field	What to enter
Student Name / Student Email / Mobile No	Account tab - the basics. Email or mobile becomes their username.
Gender, Date of Birth, Caste, Father Name, Mother Name	Personal Details tab.
School / College studied, Percentage or CGPA, Year of Passing, Stream / Course	Education tab - SSLC, PU/Diploma and Degree.
Educational Qualification, Internship interest, Technical Skills, Career Goal, Hobbies	Job tab. Technical skills is a long checklist (programming, networking, design, AI and more).
Zone, Center, State, District, Taluk, Village/GP, Pincode, Native Place, Hostel, Postal Address	Address tab. Zone and Center are required.
Course Joining Date, Choose College / Hostel	MSYEP Allotments tab.
Document uploads (7 slots)	Documents tab - photo, Aadhaar, marks cards and so on.

Giving the student a password

Field	What to enter
Password (optional)	Set the login password here so the student can sign in straight away. At least 6 characters.
Confirm Password	Type the same password again.

> Both password boxes are optional. Leave them blank and the student has no way in until you set a password from the Logins page. Fill them in and they can sign in immediately with their mobile number or email.

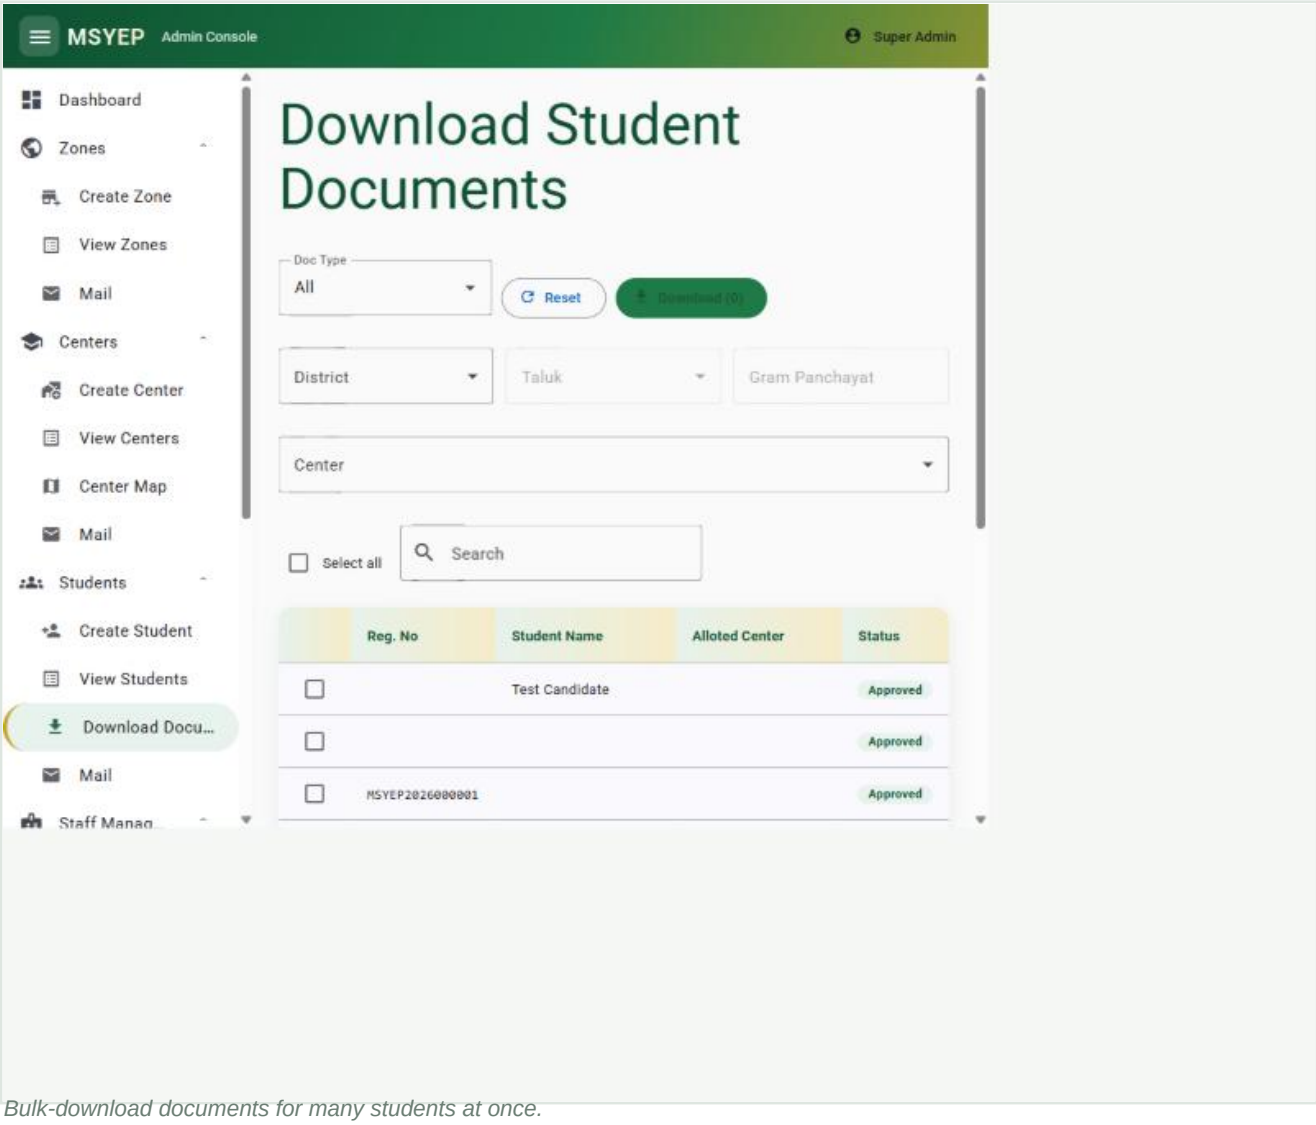

View Students

View Students, with filters and Export to Excel.

- Filter by District, Taluk, Gram Panchayat, Center or Caste, or search by name, registration number or email.
- The pencil opens the record for editing; the eye shows the full profile; the PDF icon downloads their documents.
- Export to Excel downloads everything currently shown by your filters.

Download Student Documents

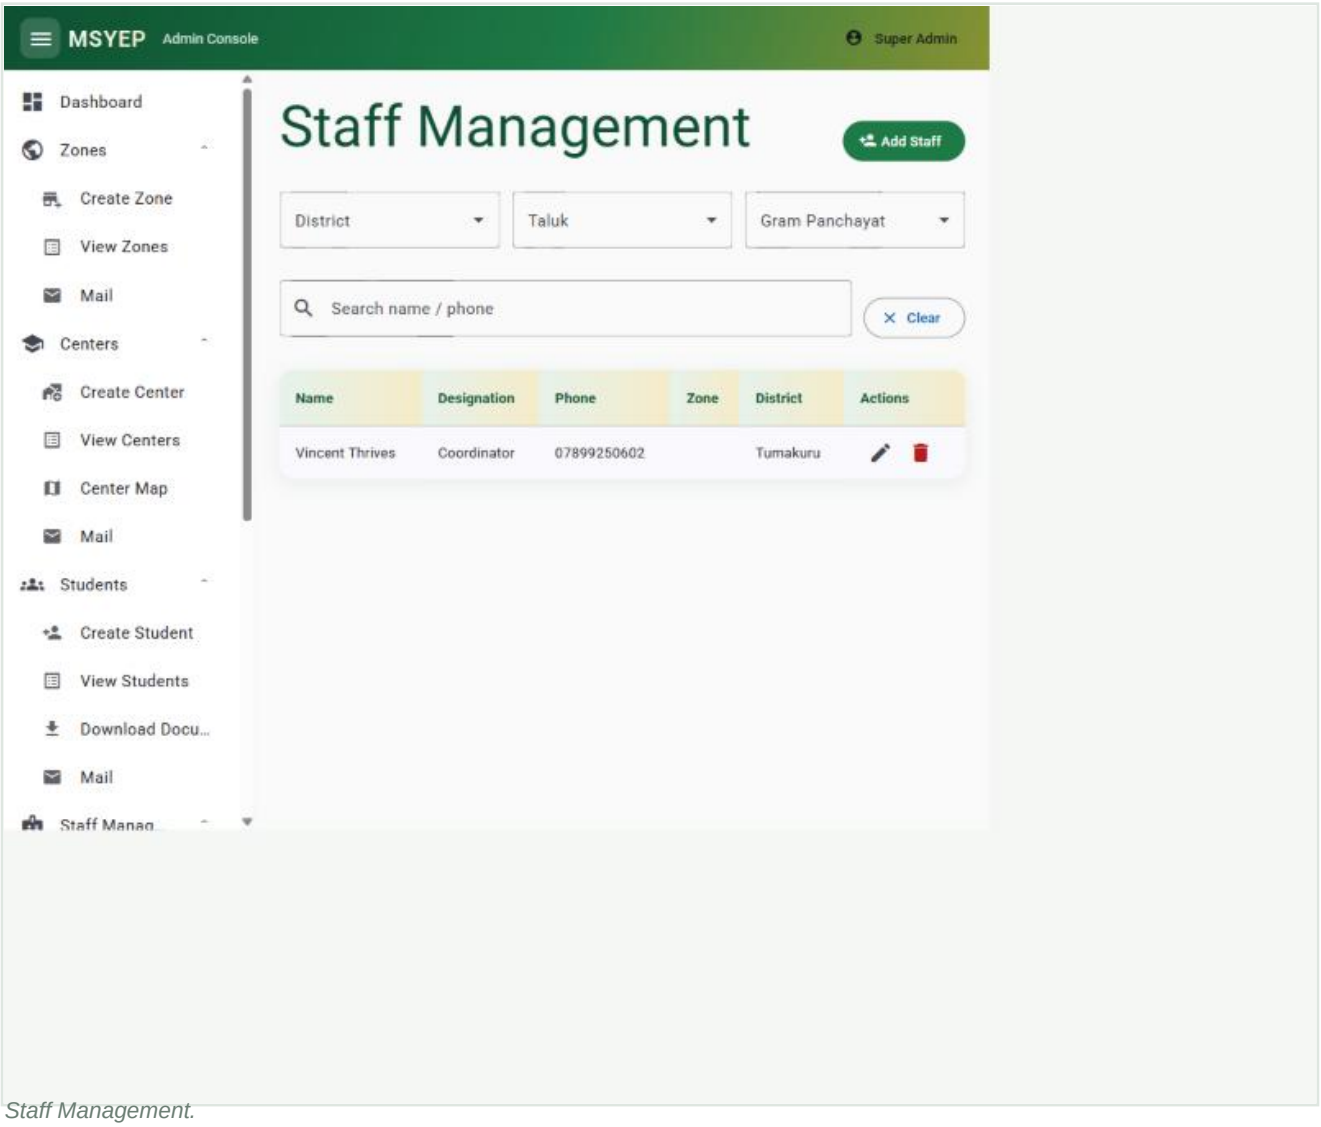

Bulk-download documents for many students at once.

1. Choose a Doc Type, or leave it on All.
2. Narrow the list with the District / Taluk / GP / Center filters, or the search box.
3. Tick the students you need, or use Select all.
4. Click Download. The button shows how many are selected.

Staff, SOW and Resource Persons

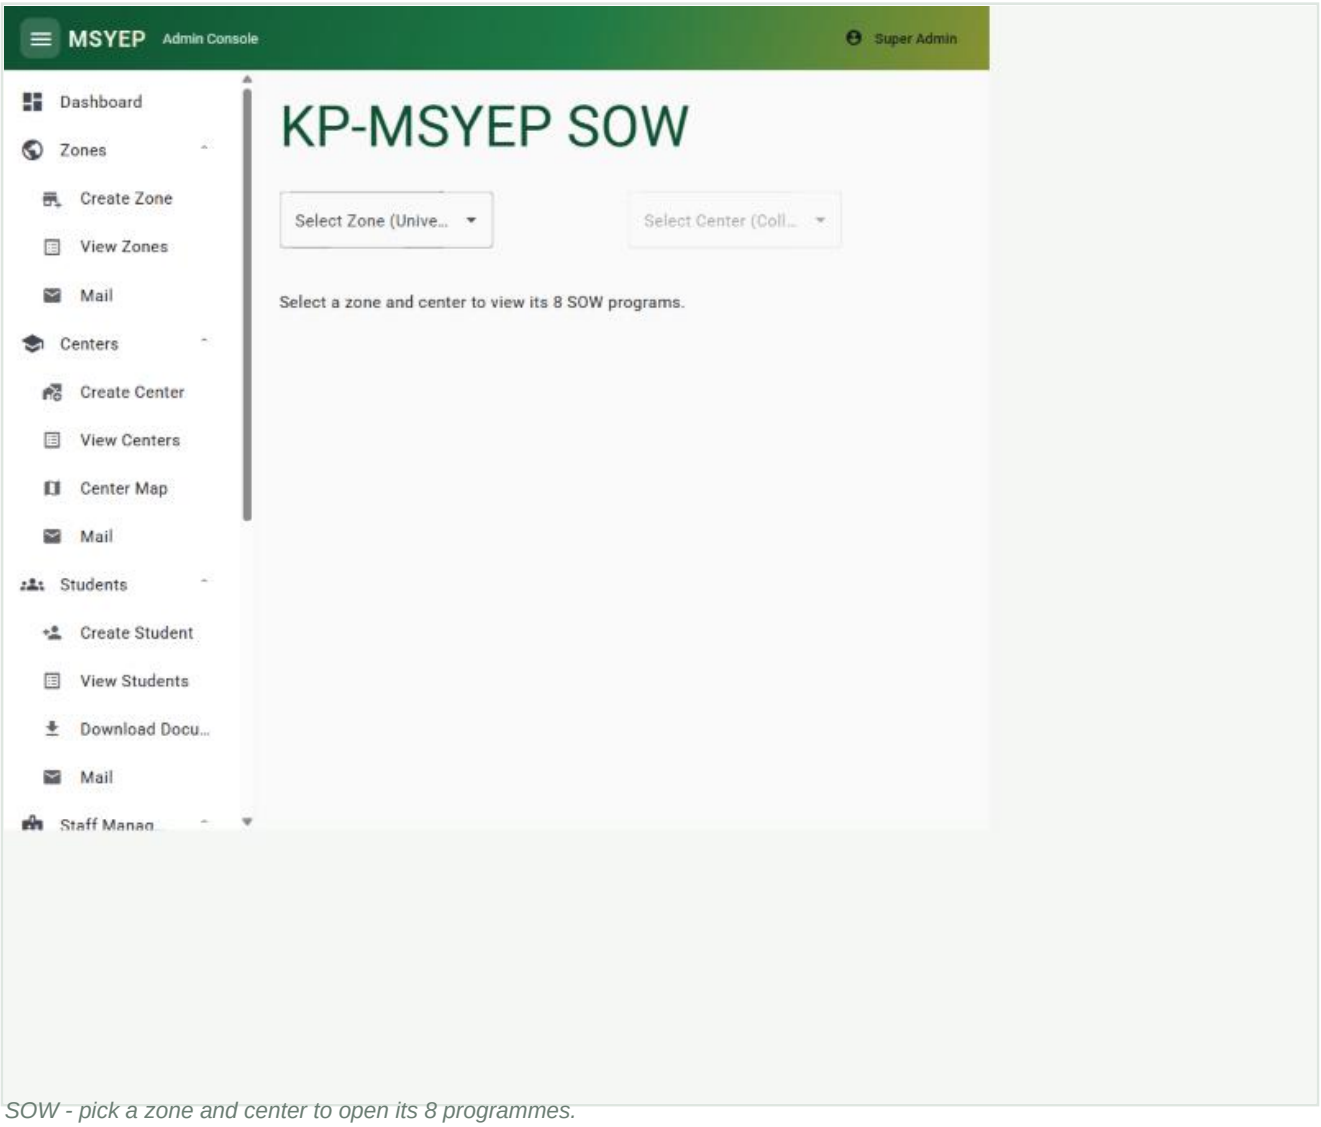

Staff Management

Staff Management.

Field	What to enter
Name / Designation / Phone / Email	Staff Details tab.
Zone (University) / Center (College)	Assignment tab - where this person works.
District / Taluk / Village or GP	Their location.

KP-MSYEP SOW

SOW - pick a zone and center to open its 8 programmes.

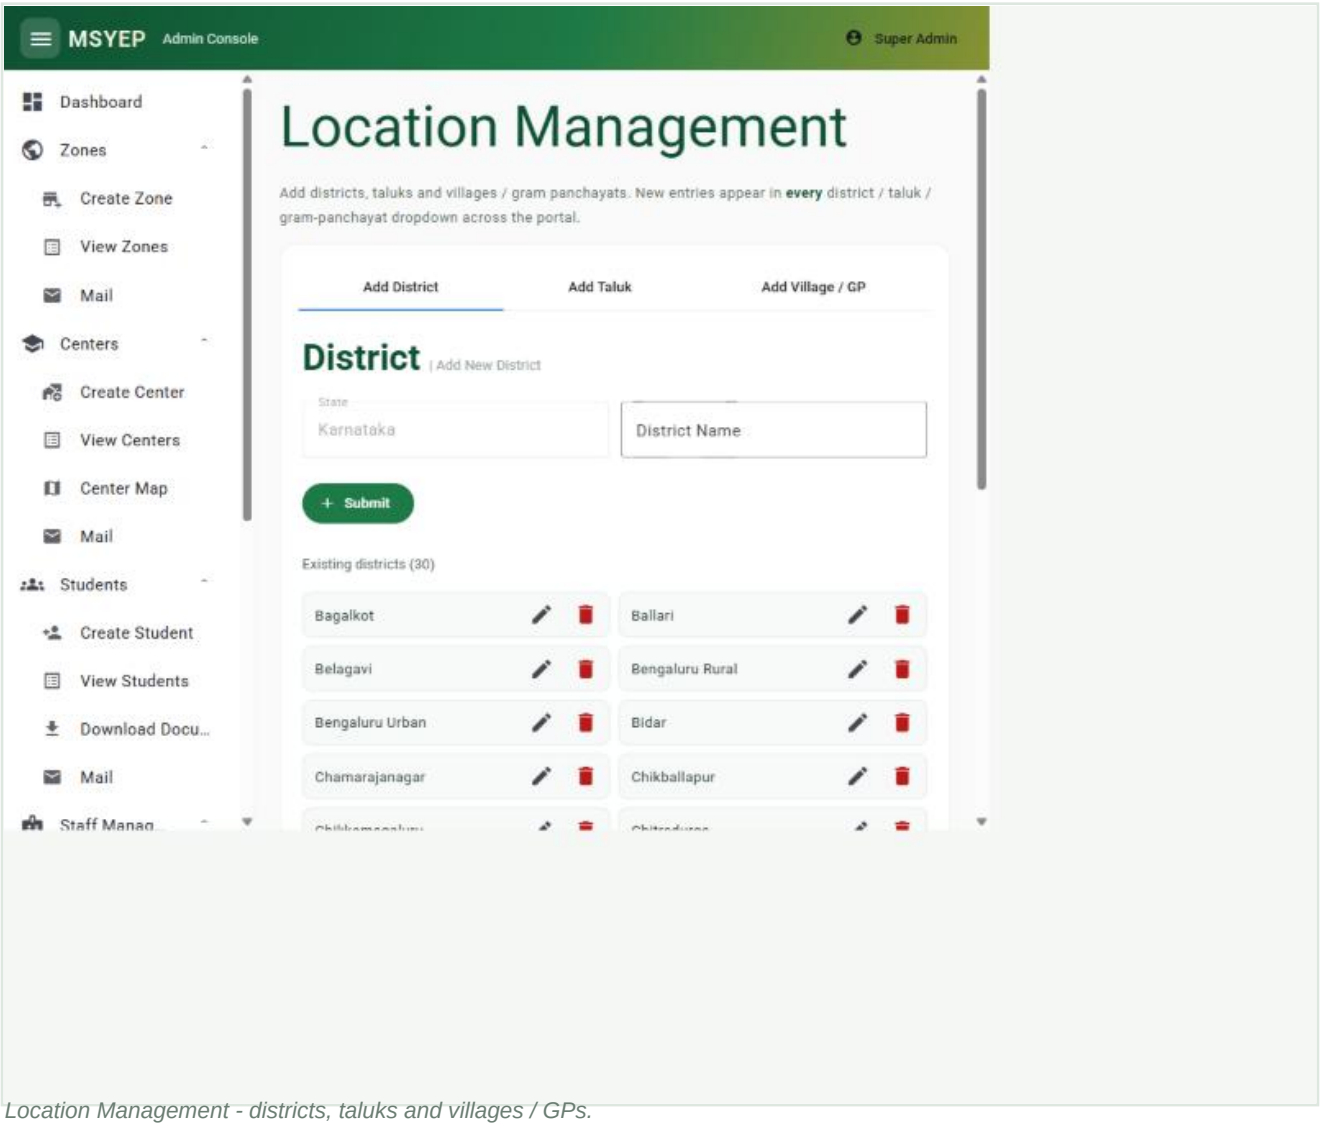

1. Choose Select Zone (University), then Select Center (College).
2. The center's 8 training programmes open. Fill in the details and upload the photos for each.
3. Use Download to get the PDF, which is also emailed to the college.

The generated file is named KP-MSYEP-Training-Programs.pdf and contains one page per programme, each with its photo gallery.

Resource Persons

Choose a zone and center to view and manage the resource persons attached to that center.

Location Management

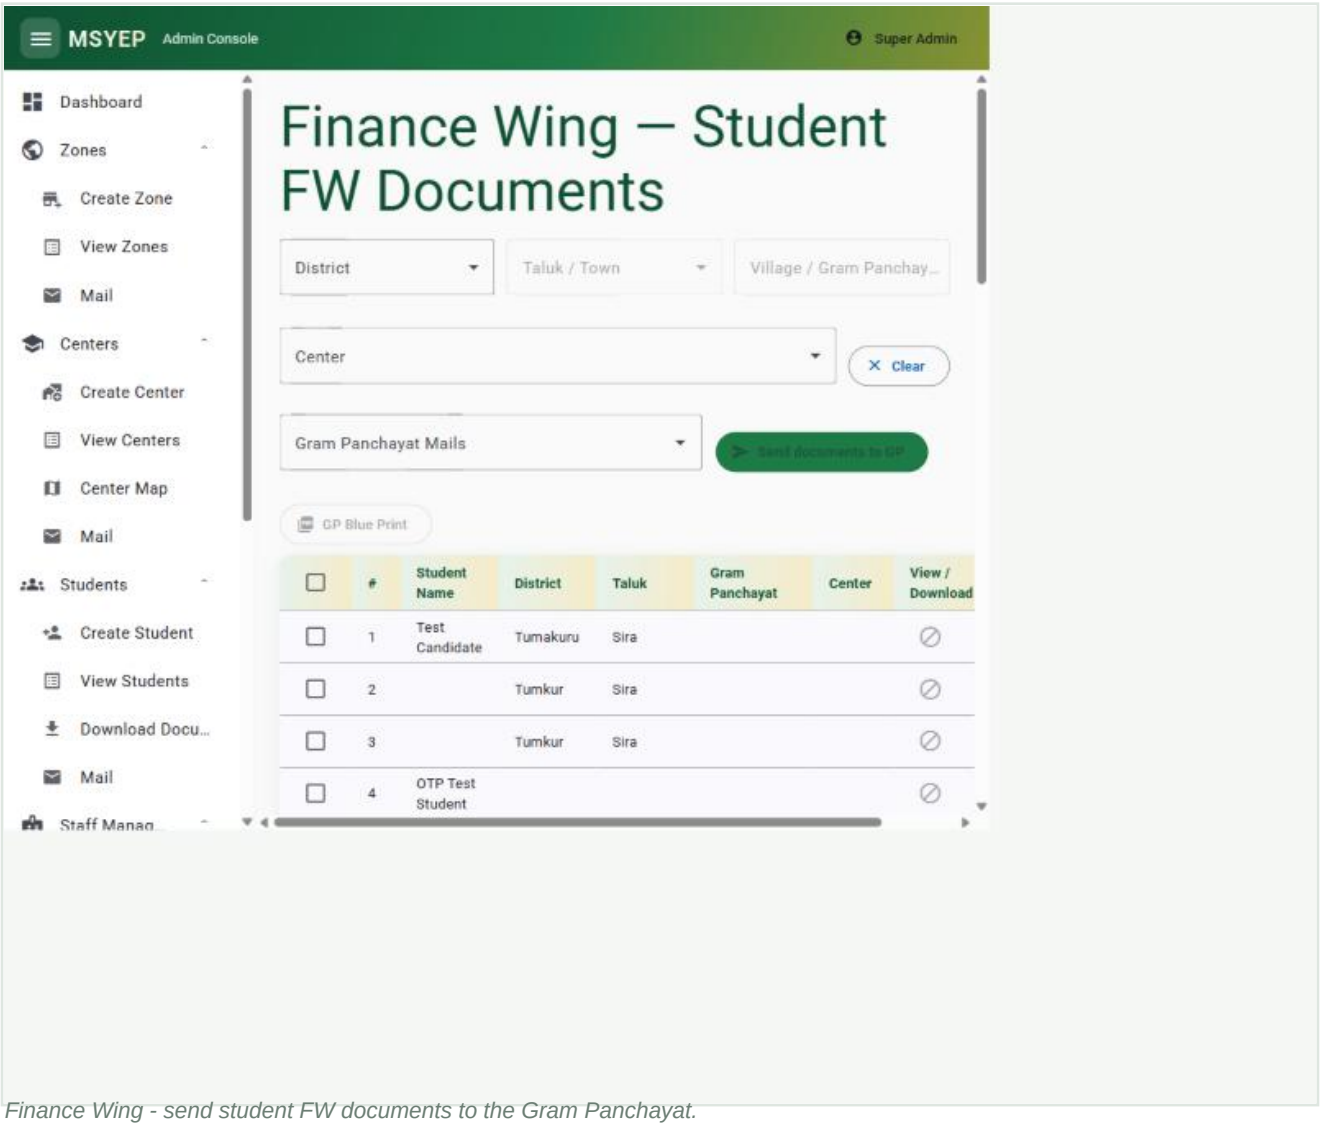

Location Management - districts, taluks and villages / GPs.

Everything you add here appears in every District / Taluk / Gram Panchayat dropdown across the portal. If someone cannot find their village when filling a form, add it here first.

Field	What to enter
Add District	State (fixed to Karnataka) and District Name.
Add Taluk	State, District, then Taluk Name.
Add Village / GP	State, District, Taluk, then Village / GP Name.

Each list below the form shows what already exists, with a pencil to rename and a bin to delete.

Finance Wing

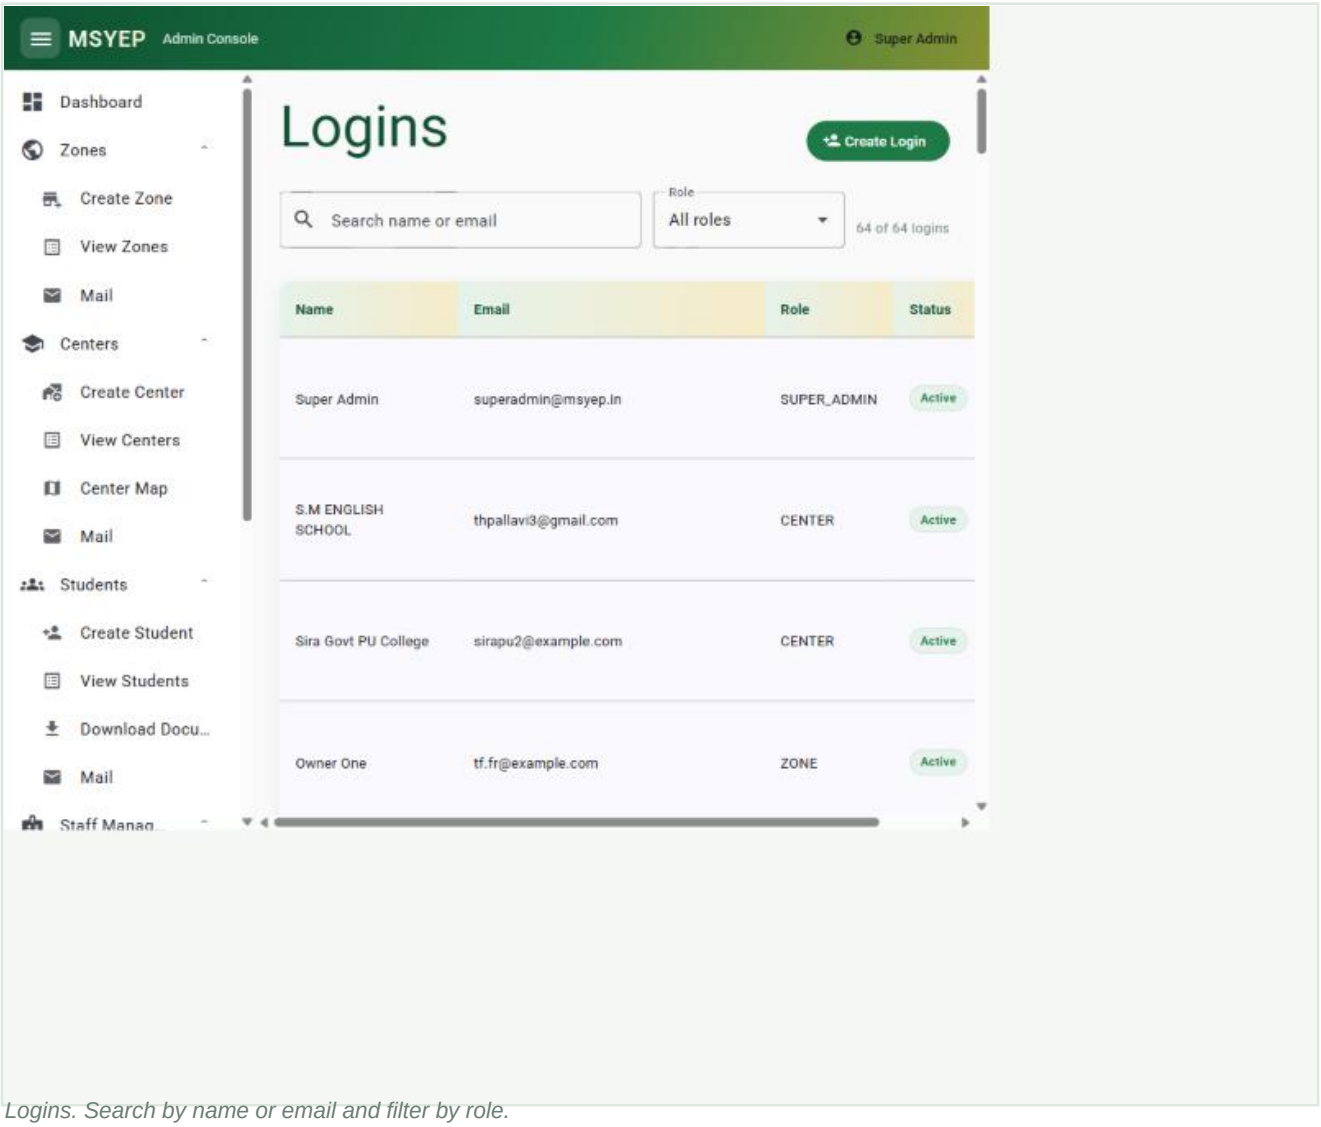

Finance Wing - send student FW documents to the Gram Panchayat.

1. Filter by District, Taluk, Village / GP and Center to find the students you need.
2. Tick the students in the table.
3. Check Gram Panchayat Mails - the GP email is filled in automatically, and you can pick different recipients.
4. Optionally click GP Blue Print to attach the GP packet.
5. Click Send documents to GP.

> Each student is mailed separately, so one failure does not stop the rest. The per-student result is recorded in Finance -> Mail.

Logins - creating and managing accounts

Logins. Search by name or email and filter by role.

This page is the only place accounts are created, suspended or given new passwords. It is available to Admin and Super Admin only.

Creating a login

1. Click Create Login.
2. Fill in Name, Email, Password and Role.
3. For a Zone role pick the Zone; for a Center role pick the Center.
4. Click Create. The person can sign in straight away.

Field	What to enter
Name	Person or institution the login belongs to.
Email	This is the username they sign in with.
Password	Their first password - use the eye icon to check it.
Role	Admin, Zone, Center, Staff or Finance.
Zone / Center	Shown only for Zone and Center roles; ties the login to that record.

Finding a login

- Search matches both name and email - typing part of either narrows the list.

- The Role dropdown filters to one role, including Student and Super Admin.
- The counter shows how many of the total are currently listed.

The three row actions

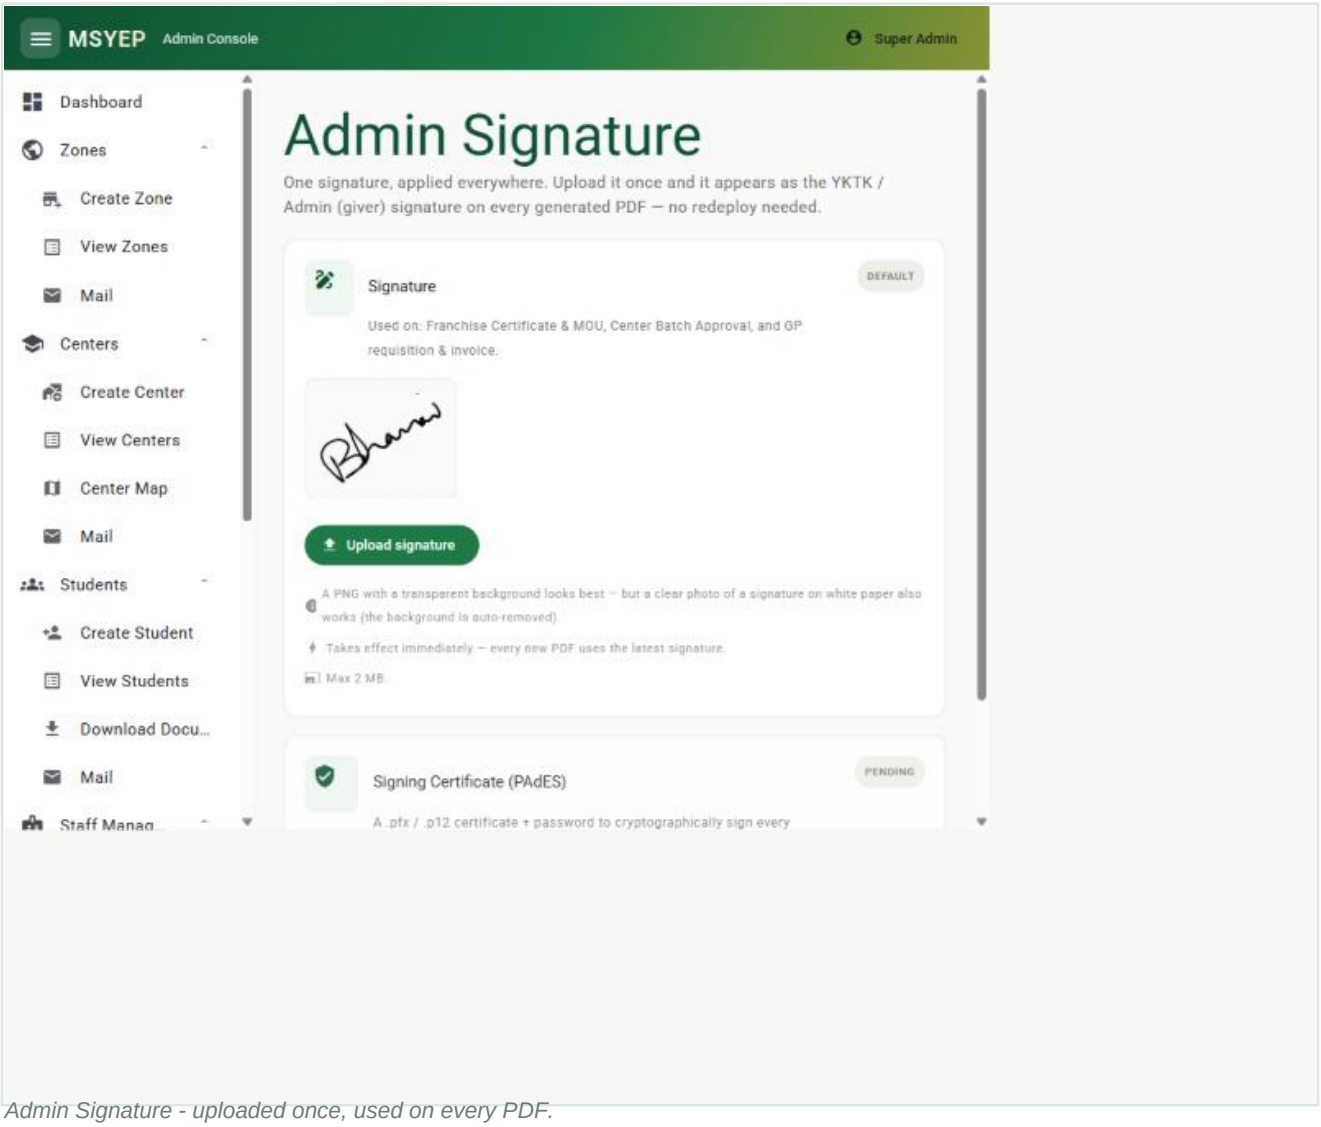

Field	What to enter
[Key] Reset password	Set a new password without needing the old one. Type it twice; each box has an eye icon. Minimum 6 characters.
[Toggle] Activate / Deactivate	Deactivating blocks sign-in but keeps the account and its history. Reversible at any time.
[Delete] Delete	Removes the login permanently. Use Deactivate instead if you may need it later.

> Two safeguards: you cannot deactivate your own login, and the last active Super Admin cannot be deactivated. Both would lock everyone out of this page.

Common tasks

- Someone forgot their password - find them, click the key, set a new one, tell them.
- Someone has left - click the toggle to deactivate. Their records stay intact.
- A student cannot sign in - they may have been created by an admin and never given a password. Set one with the key.

Admin Signature

Admin Signature - uploaded once, used on every PDF.

Upload the authorised signature once and it appears automatically as the YKTK / giver signature on every document the system generates: the Franchise Certificate, the MOU, the Center Batch Approval, and the GP requisition and invoice.

1. Click Upload signature.
2. Choose a PNG with a transparent background, or a clear photo of a signature on white paper.
3. It takes effect immediately - the next PDF generated uses the new signature. No redeploy is needed.

- Maximum file size 2 MB.
- A photo on white paper is fine - the background is removed automatically so the signature never covers the text underneath.
- A scanned PDF of a signature also works.

If something goes wrong

Field	What to enter
"Waking up the server..."	Normal. The server sleeps when idle and takes up to a minute to start. Wait.
Could not reach the server	The server is starting or the internet dropped. Try again in a moment.

Mail shows 0/1 sent	The mail server could not be reached. Try sending again.
Mail shows "stub - SMTP not configured"	The server has no mail credentials - nothing was sent. Contact whoever manages the hosting.
A village or taluk is missing from a dropdown	Add it on the Location page; it then appears everywhere.
A login does not work	Check on the Logins page whether the account shows Deactivated, and reset the password if needed.
The MOU takes a long time	Only the first download per zone is slow. After that it is cached and instant.
